

Client - plik konfiguracyjny

Położenie: /etc/cups/client.conf

© Imagine Studio 2005, <http://myGentoo.tk>

```
# "$Id: client.conf,v 1.6 2002/12/17 18:56:38 swdev Exp $"
# ServerName: the hostname of your server. By default CUPS will use the hostname of the system or the value of the CUPS_SERVER
environment variable.
```

ServerName *server.imagine*

```
# Encryption: whether or not to use encryption; this depends on having the OpenSSL library linked into the CUPS library. Possible
values:
```

```
# Always - Always use encryption (SSL)
```

```
# Never - Never use encryption
```

```
# Required - Use TLS encryption upgrade
```

```
# IfRequested - Use encryption if the server requests it
```

```
# The default value is "IfRequested". This parameter can also be set using the CUPS_ENCRYPTION environment variable.
```

Encryption *IfRequested*

```
# End of "$Id: client.conf,v 1.6 2002/12/17 18:56:38 swdev Exp $".
```
